General. The Federal Telecommunications System (FTS) is a Government network of leased long-distance circuits. Official calls may be made through the FTS to any telephone within the continental United States. Full benefits of the FTS are dependent on the use of the following instructions.

Access Codes. The FTS access code "8" is used to connect your telephone to the FTS equipment. You must dial your FTS access code to make an FTS call. Use the FTS User's Guide for FTS Government numbers only.

Area Codes. Area codes must be dialed for all commercial calls. These codes may be found on the map on pages 4 and 5.

How to Place Calls to FTS Telephones (Govt)

You Dial

Access Code 8	Telephone No. 350-5011

Example: To call 350-5011 in Miami, Fla.

How to Place Calls to Non-FTS Telephones (Non-Govt)

You Dial

Access Code 8	Area Code 313	Telephone No. 337-4812

Example: To call 337-4812

DISTANT INFORMATION

To obtain FTS telephone numbers, dial the information number listed in the FTS User's Guide for the city in which the Department or Agency is located. Keep a record in your frequently called number list of all numbers you obtain from the FTS information operator.

To obtain non-FTS telephone numbers, dial 8 + Area Code + 555-1212.

To report trouble, dial 496-5671. NOTE: IDENTIFY TROUBLE AS FTS WHEN REPORTING.

To call the National Institute of Environmental Health Sciences in Research Triangle Park, North Carolina, DIAL 8-629 plus the extension. If the extension is unknown, DIAL 8-629-2111. The commercial number is 919-541 plus the extension, and information is 919-541-2111.

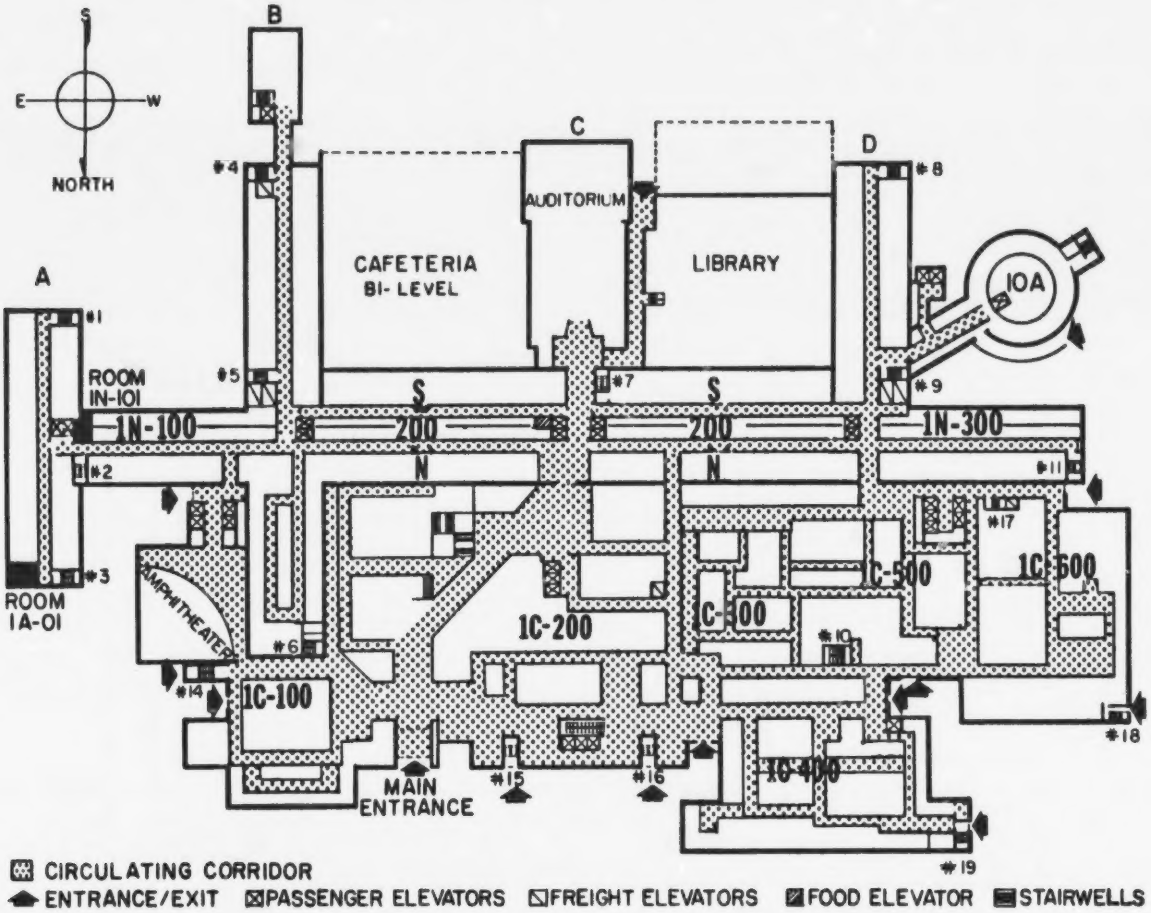
Numbering System for the Clinical Center



Commencing with the main entrance as a point of reference, all rooms are identified in a block series beginning on the east side with the 100 series and extending to the 600 series on the far west. All rooms are designated by floor, corridor, and room number.

Progressing farther into the building, you will encounter two (2) parallel corridors running east and west. These are:

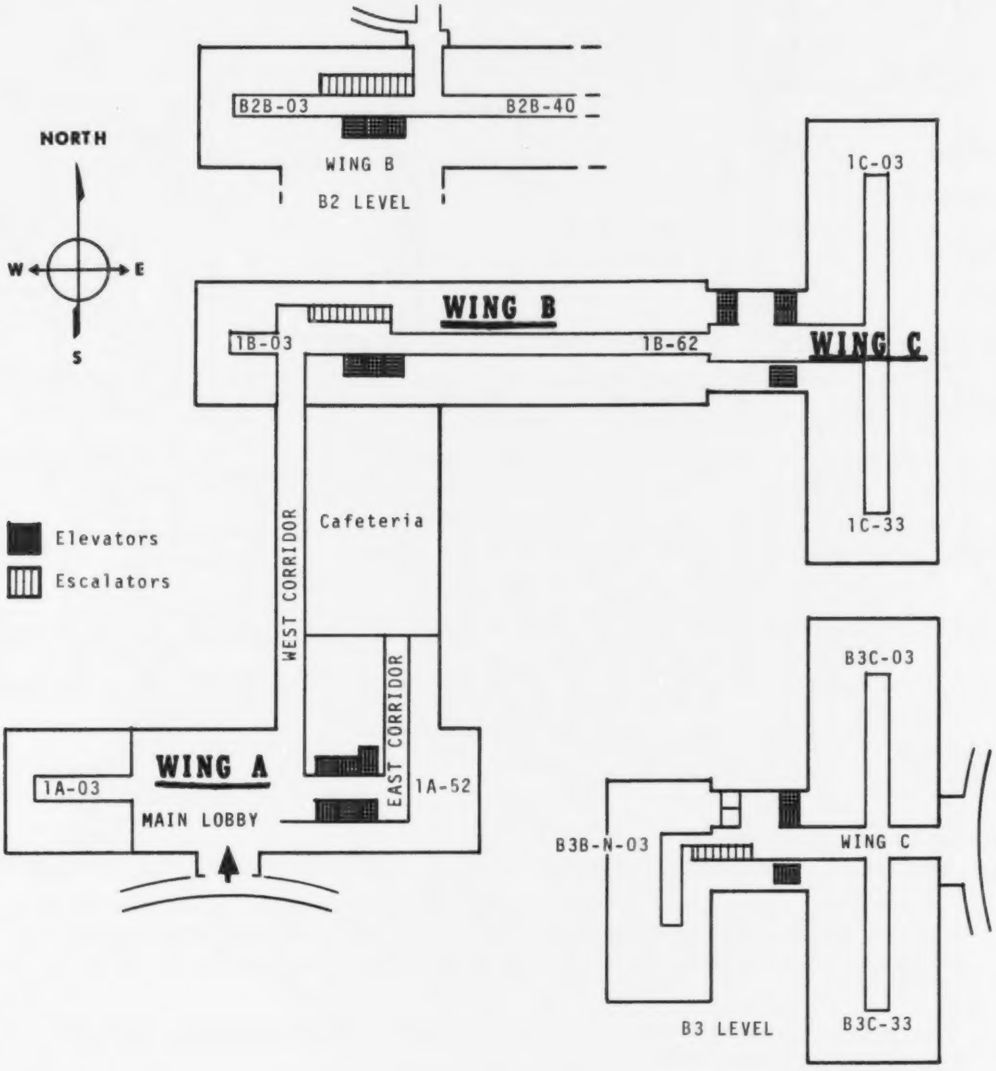
Corridor N (north side of the building), used for research, and,
Corridor S (south side of the building), used for patient care.

In Corridors N and S, all numbered rooms begin at the east end, even numbered rooms being on the north side and odd numbered rooms on the south. For example, 1N-101 would be located on the 1st floor at the distant east end of the North Corridor.

In addition, there are four (4) corridors that run north and south. These are A, B, C, and D. All numbered rooms on these corridors begin at the north end with odd numbered rooms being on the east and even numbered rooms on the west.

The Surgical Wing, Building 10A, is accessible from the Clinical Center on five (5) levels, B1 through the 4th floor. The entrance corridor rooms, found on the 1st through 4th floors, are numbered in sequence as a continuance of the South Corridor of the Clinical Center.

Numbering System for Building 31



All rooms are designated by floor, wing and room number. For example 2A–03. This indicates that the room is located on the second floor, Wing A.

All rooms are numbered in sequence beginning at the West end of each wing. Odd numbered rooms are on the North side while even numbered rooms are on the South side of corridors.

Two corridors run North and South between Wing A and Wing B at the 1st Floor level and B1 level.

First Floor Level:
East Corridor – Conference Rooms, Cafeteria, etc.
West Corridor – Vending Stand, Cafeteria, etc.

B1 Level:
East Corridor – Mail Room, R & W Gift Shop and Self Service Store.
West Corridor – Conference Room No. 5.

The Printing Plant is located in the B3 Level and B4 Level in Wings C and B.

The sixth floor, Wing C is comprised of major conference rooms.
